# Aizaz Sharif

+92 305 9221199 :: Islamabad, 44000, Pakistan
aizazsharif@gmail.com :: **https://aizazsharif.github.io**
**https://www.linkedin.com/in/AizazSharif**

## EDUCATION

**Robotics Nanodegree (RND)** Udacity — June 2018-To Date
**Masters of Computer Science (MSCS)** FAST-NUCES, Peshawar, Pakistan **-** GPA: 3.5/4.00 — August 2017-To Date
**Data Analyst Nanodegree (DAND)** Udacity — Dec 2016-August 2017
**Deep Learning Nanodegree (DLND)** Udacity — January 2017-July 2017
**Bachelors of Computer Science (BSCS)** FAST-NUCES, Peshawar, Pakistan **-** GPA: 3.84/4.00 — August 2012-May 2016

## TECHNICAL SKILLS

**Programming Languages**: JAVA, C++/C, Python, JavaScript, Go, Bash
**Machine Learning**: Supervised Learning, Unsupervised Learning, Generative Models, Deep Learning, Natural Language Processing
**Analytics**: IPython, SQL, Tableau, Excel, R
**Tools/Libraries**: OpenCV, Tensorflow, Keras, Tesseract, NodeJs, Sklearn, Git, CUDA

## KEY PROJECTS

**Handwriting Generation Using Recurrent Neural Networks** (GitHub) — June 2018

- Pytorch Implementation of Conditional + Unconditional Handwriting generation on 3-dimentional sequence dataset.
- Implemented Handwriting Synthesis with the help of LSTM and Attention Mechanism using Python.

**Search and Sample Return** (GitHub) — September 2017

- Utilizing Computer Vision to train Rover in a Mars Planet simulation capable of identifying rocks, obstacles and paths with high fidelity.
- Requires OpenCV in Python as well as Socket Programming.

**Language Translation Using Deep Learning LSTM** (GitHub) — July 2017

- Training a sequence-to-sequence model on a dataset of English and French sentences that can translate new sentences from English to French.
- Involves Tensorflow and Usage of LSTM Sequence-to-Sequence Model.

**Generate Faces Using Deep Learning GANs** (GitHub) — June 2017

- Using the latest innovation in Generative models to generate unseen data of faces.
- Uses Tensorflow to implement Convolutional Neural Network and Generative Adversarial Network.

## WORK EXPERIENCE

**FAST-NUCES, Peshawar –** Research Assistant — September 2017-To Date

- Working under 'Colab' Research group for the campus.
- Involved in research areas related to GANs, Android Malware Detection, and Seismic Monitoring Network.
- Wrote and submitted a Journal paper at Computational & Mathematical Organization Theory (CMOT) Journal.

**DCUBE Technologies, Islamabad –** Software Engineer (Machine Learning) — April 2017-June 2017

- Worked under the 'Product Innovation and Strategy' team.
- Integrated state-of-the-art OCR libraries including GoogleVision, Omnipage, Ocropy and CLSTM to an ongoing C++ based large scale library.
- Tested Deep Learning based OCR libraries on letters images provided by Pitney Bowes and TCS.
- Increased the accuracy of the OCR prediction by 10% along with performance optimization.
- Gained Skills in OCR Pipeline, Python Linux Shell Scripting, Computer Vision and Deep Learning.

**Techlogix, Islamabad -** Software Engineer — October 2016-April 2017

- Worked as a Software Engineer for the Implementation and support of FLEXCUBE which is Oracle Universal Banking Solution.
- Implemented a workflow using PL/SQL for a smooth migration process from old to the proposed Oracle Solution under strict deadlines.
- Provided continuous support to the migrated system for running daily ongoing transactions with ease.

**Nextbridge (Pvt) Ltd. -** Software Engineer Intern — July 2016-October 2016

- Worked as Intern under the program "Web Development Training".
- Captured basics on PHP and Javascript frameworks including Laravel, Angular, NodeJs and MongoDB for a complete MVC based Web application.

## KEY ACHIEVEMENTS & AWARDS

- **7 Gold Medals and 1 Silver Medal -** FAST-NUCES, Peshawar, Pakistan — August 2012-May 2016
- **7 Deans list and 1 Rector List Certifications -** FAST-NUCES, Peshawar, Pakistan — August 2012-May 2016
